PROFILE

I'm a senior web developer with over a decade of experience building things people actually use on the web. My work spans WordPress sites, Vue-powered applications, and everything in between — from pixel-level front-end polish to collaborating with dev teams on larger product builds. I take ownership seriously, communicate clearly, and care about getting the details right.

EXPERIENCE

Senior Web Developer — Homewood Health Inc.

October 2024 – Present (formerly Mobility Quotient Solutions Inc., acquired by Homewood Health)

- Contributed to front-end development as part of a collaborative team on the company's primary web applications: Homeweb.ca and Sentioapp.com — an Employee and Family Assistance Program (EFAP) and an Online Cognitive Behavioural Therapy tool, both built with Symfony, Vue, and Bootstrap.
- Own and maintain all customer-facing WordPress websites including homewoodhealth.com, homewoodcareers.com, homewoodhealthcentre.com, ravensview.com, theresidenceathomewood.com, and homewoodpathfinder.com.
- Collaborate with an internal development team to plan, scope, and deliver new features and improvements across all digital properties.
- Ensure all public-facing web platforms meet WCAG 2.1 AA accessibility standards, maintaining consistency, performance, and brand alignment across properties.
- Contributed to the development of an internal publishing tool used to create online learning programs, enabling subject matter experts to author article content and interactive activities for digital delivery.

Web Developer — Mobility Quotient Solutions Inc.

May 2018 – October 2024 (acquired by Homewood Health)

- Developed and maintained websites for Winsight Media (now Informa Connect) and its subsidiary brands across 6+ B2B publication and event websites, creating reusable components, implementing new features, and ensuring a consistent user experience across their digital portfolio.
    - Contributed to the development of an internal publishing platform used to author and publish articles across Winsight Media's portfolio of websites and subsidiary brands.
- Contributed to front-end development as part of a collaborative team on a home inspection reporting platform for creating and managing inspection reports, built with Symfony and Twig.
- Compliance Safe — Cloud-based compliance document management platform:
    - Contributed to the development and maintenance of a cloud-based platform helping multi-location businesses manage compliance documents including permits, licenses, certifications, and regulatory records.
    - Built and enhanced user-facing features including document storage, dashboards, search and filtering, and automated expiration notifications for time-sensitive compliance records.
    - Implemented and maintained Twig templates and front-end functionality across the application.

Web Developer — Top Shelf Media

October 2017 – March 2018

- Built and maintained client sites using WordPress as a CMS.
- Provided accurate time estimates and recommendations for projects.
- Created and maintained documentation for completed projects.

Web Developer → Web Team Lead — Ballistic Arts Media Studios Inc.

July 2012 – April 2017 (promoted to Web Team Lead, July 2014)

- Led a team of four developers, organizing and delegating tasks across all active projects.
- Reviewed work throughout the development process to ensure quality and accuracy.
- Developed internal procedures and processes to increase efficiency and streamline workflow.
- Monitored project timelines and scope; collaborated with project managers to align deliverables with client goals.
- Developed custom WordPress sites from design mockups using HTML/CSS, JavaScript, and PHP.
- Coded and deployed sites with mobile responsiveness and cross-browser compatibility.
- Worked closely with project managers, designers, and clients throughout the development process, balancing user experience with business objectives to deliver sites that met both design intent and client goals.
- Configured and managed cPanel hosting environments, handling full deployment pipelines from local development through staging to live.
- Partnered with the SEO team to implement technical best practices across all client projects, while advising on recommendations related to site structure, performance, and on-page optimization.
- Delivered post-launch training to 20+ clients through in-person and video sessions, supplemented by written documentation to support ongoing self-management of their sites.

TECHNICAL SKILLS

Languages: HTML5, CSS3 / SASS, JavaScript, PHP

Frameworks & Templating: Vue, Bootstrap, Twig, jQuery

CMS: WordPress

Build Tools: NPM, Grunt

Versioning: Git

PROFESSIONAL DEVELOPMENT

Claude Code (Anthropic) · Currently learning AI-assisted development workflows using Claude Code, exploring how large language models can be integrated into everyday coding tasks to improve productivity and code quality.

SOFT SKILLS

Professional verbal and written communication · Works well under pressure and deadlines · Creative and collaborative problem solver · Team player · Fast and continuous learner
